FURCATION RECRUITMENT

Role : Software Developer

Description

Furcation is one of the UK's major yearly furry events, and our Technology team is looking for software developers to help build and maintain the software we use to run the event. This includes our attendee registration platform (RAVE), and the associated tools our staff use to support and assist attendees during the convention.

Furcation prides itself on involving its volunteer staff in many of the decisions underpinning the event. We have a friendly, inclusive and welcoming internal culture which is built on an internal free exchange of ideas. In everything we do, we try our best to make sure the needs of our attendees come first.

Skills Required

Experience with either the Python, PHP or a similar programming language is essential.

A working knowledge of some or all of the following technologies would also be beneficial:

- Web development in Python or PHP
- HTML, CSS, and/or Javascript web development
- SQL (any server e.g. MySQL, MariaDB, PostgreSQL)
- AMQP, MQTT, Stomp, Mosquitto or RabbitMQ message servers
- Software version control and change management with Git, Mercurial, Subversion or similar industry-standard tools

We have some flexibility and you don't need to have all the skills listed above. If you're happy to learn, we're happy to teach!

How to Apply

Send an email to it@furcation.org.uk with a little bit of information about yourself and your experience.

If you've worked on any previous projects you can discuss, please mention them. Please also include a link to any open-source projects you've worked on (e.g. on Github or Bitbucket), if any.

Privacy Notice

Your e-mail address and any personal information will be processed under strict guidelines enforced by the GDPR. Your details will only be held for as long as required to process your application and will be securely erased once we have satisfied our legal requirements. For further information, contact our Data Protection Officer at dpo@furcation.org.uk.
